

“Carol I” National Defence University

Advanced Distributed Learning Department

**Advanced Distributed Learning
in education and training transformation**

Managing and developing the ADL integrated solutions
Immersive technologies in ADL.
Interoperability and reusability of the elearning objects

**BUCHAREST
April 15-16, 2010**

Chairman

Professor Dr. **Ion ROCEANU**,
Director of the Advanced Distributed
Learning Department,
"Carol I" National Defence University.

Scientific Committee

Professor Dr. **Teodor FRUNZETI**,
Rector, "Carol I" National Defence University
Paul JESUKIEWICZ,
Director Advanced Distributed
Learning Initiative, U.S.A.
Dr. **Robert WISHER**,
Advanced Distributed Learning Initiative, U.S.A.
Joseph Camacho,
Program Manager, Joint Knowledge
Development and Distribution Capability,
United States Joint Forces Command, U.S.A.
Dr. **Gokay SURSAL**,
Section Head, Joint ADL and Simulation NATO
Professor Dr. **Marin VLADA**,
University of Bucharest
Professor Dr. **Adrian ADASCALITEI**,
Technical "Gh. Asachi" University, Iasi
Professor Dr. **Florin POPENTIU-VLADICESCU**,
UNESCO Chairholder at University of ORADEA
Professor **Radu JUGUREANU**,
eContent Manager of the SIVECO Romania
Senior Researcher **Kateryna SYNITSYA**,
International Research and Training Centre for
Information Technologies and Systems, Ukraine

The central topic of the 6th edition of the annual eLearning and Software for Education (eLSE) conference that will be held in 2010 is:

“Advanced Distributed Learning in education and training transformation”

Managing and developing the ADL integrated solutions.

This topic is reserved to present case studies, best practices in ADL domain, innovative solutions in designing and realization of the support management systems for education and training, solutions and systems that evaluate the performance of virtual learning environment and assess the actors' performances.

Immersive technologies in ADL.

The discussions will be directed to respond the specific issues regarding the serious games, distributed simulation, multitouch, virtual world, m-learning, 3D solutions and other related activities.

Interoperability and reusability of the elearning objects.

This topic is dedicated for the presentation of solutions regarding technical solutions and approach on interoperability, reusability of elearning objects, repositories and sequencing.

eLSE

2010

In partnership with:

Nowadays education is continuously challenged to transformation by two main factors: the changes in the global environment in domains of security, politics, economy, social issues and the development of the new technologies that provide new opportunities and innovations for both teachers and students.

Papers describing original works on applicable solutions in the field of educational processes, theories, methodologies and software solutions are accepted for presentation in the conference.

Important dates:

Papers proposal: 30.01.2010
Abstract confirmation: 10.02.2010
Full paper submission: 10.03.2010

Conference fee: 200 RON (50 Euro).

Registration and all other details are published on the web page <http://www.adlunap.ro/else2010> or provided on request via e-mail: else@adlunap.ro.
